

## Awards and Certifications

CUPIA has been recognized for its excellence in trade facilitation and innovation by the World Customs Organization (WCO) through successful system implementation examples.

In addition, CUPIA has obtained the international standard information security certification, **ISO 27001**, ensuring its stability and reliability on a global scale.

**WCO Certificate of Merit for Ethiopia Single Window**

**WCO Certificate of Merit for Tanzania customs system**

## Cutting-edge Technology

### AI-powered Features

- AI Risk Channel
- AI HS Classification
- AI Valuation
- AI SAD Generation
- AI Performance Monitoring

### Cloud-based MSA

CUPIA adopted **Cloud-based Micro Service Architecture (MSA)** to UNI-PASS.

This ensures that even if a failure occurs in a module, it does not affect the integrity of the entire system, resulting in a more **stable and sustainable operation**.

## Stay Independent

### Source Code

That's right! We **provide the full source code**—no fine print, no hidden conditions.

What does that mean? Full **customization**. Seamless **integration**. **Independent** maintenance.

Want to run the system yourself?

### No Hidden/Ongoing Costs

Development typically takes 24 months, followed by 12 months of stabilization and warranty.

What comes next? **No lock-in**. **No license fees**. **No mandatory contracts**.

Want to truly own it?

**YOU CAN!**

### Client-embedded Joint Development Program

The CUPIA team collaborates closely with the client's dedicated team to jointly conduct system development. After system delivery, the dedicated team plays a central role in system operation and maintenance.

## Build Capacity

# Digital Customs Innovation X Partnership for Mutual Success

UNI-PASS is a comprehensive customs management system developed by the Korea Customs Service. UNI-PASS features swift clearance in a fully paperless environment, ensures accurate duty collection through AI-driven capabilities, control of illegal trade with a series cross-check measures, and delivers high user satisfaction through a consumer-centric system design.

Customs UNI-PASS International Agency (CUPIA) was established in accordance with the Customs Act of the Republic of Korea, under the supervision of the Korea Customs Service.

Based on UNI-PASS, CUPIA has been delivering tailor-made solutions for customs and tax authorities. To date, CUPIA's UNI-PASS has been successfully implemented in 11 countries worldwide.

# Global Footprint

System implemented in  
**11** countries

Consultancy provided for  
**34** Countries

Projects worth over  
**340** million USD
